

Session 1

Assignment 4 Question

Session 1: Assignment 4

Table of Contents

1. Introduction

2. Problem Statement

3. Output

1. Introduction

This assignment will help you to consolidate the concepts learnt in the session.

2. Problem Statement

Write a Python program to find the volume of a sphere with diameter 12 cm.

Formula: $V = \frac{4}{3} * \pi * r^3$

NOTE: The solution shared through Github directory should contain the source code used and screenshot of the output.

3. Output

N/A
